

Mentoring is a structured process aimed at improving your skills and understanding in the game of bridge. Here's a breakdown of what mentoring entails and how it can benefit your game:

1. **Structured Guidance:** Mentoring involves having an experienced player, or mentor, sit with you and a few others during a bridge game. This mentor provides guidance and feedback on your bidding, play, and defence throughout the game.
2. **Debriefing Sessions:** At the end of each hand, the mentor conducts a thorough debriefing session where they analyse your decisions and actions. They highlight areas where improvements can be made and explain the reasons behind their suggestions.
3. **Learning through Experience:** Mentoring allows you to learn from practical experience in a supportive environment. The focus is on understanding the logic behind bridge strategies and applying them effectively during gameplay.
4. **Pressure-Free Environment:** Unlike competitive sessions, mentoring sessions are pressure-free. This creates a conducive atmosphere for learning and experimentation without the fear of making mistakes.
5. **Skill Development:** Mentoring helps in developing skills such as logical deduction, pattern recognition, and strategic thinking, which are essential for becoming a proficient bridge player.
6. **Contributing to the Bridge Community:** Mentors volunteer their time and expertise to help others improve their bridge skills. By participating in mentoring sessions, you also contribute to the bridge community and foster a culture of learning and growth.

Sessions will recommence on Monday, the 4th of March, starting at 6:45 PM for a 7:00 PM session. The sessions will continue on the second Monday of every month, with adjustments for public holidays as needed. If you're interested in attending, you can contact Larry Moses via phone at 0402106952 or email at larrymoses@gmail.com to confirm your participation.
